

LEADING THE WAY

VAN HALTEREN 
METAAL

VAN HALTEREN

At Van Halteren we believe that there must be a challenge in everything we do. This sometimes means an extension or adjustment to an existing product or sometimes something completely new. Something that no-one has ever tried before. Something that encourages us to find creative solutions and above all which makes this fun to do.

what they do and for whom high quality is a matter of course. Our organisation is transparent and communication lines are short. The staff turnover is small. New technologies provide a constant challenge. We are constantly working on development projects. We have long-term partnerships with our relations – both clients and suppliers.

to over 250 employees, we operate fully independently and autonomously. Constant innovation, lots of experience, competence and not least cooperation with our relations make it possible to offer a great variety of products and services.

To achieve this we have dedicated people working for us who are proud of

As part of the Van Halteren Group, a Dutch family business that offers work

VAN HALTEREN METAAL

Under the name Van Halteren Metaal, since our establishment as an industrial supplier in 1969, we have been focussing on clients from a wide range of markets. Van Halteren has modern machinery and a well equipped construction workshop.

- CNC milling (3-axis, 4-axis and 5-axis simultaneously)
- CNC boring
- CNC turning
- Certified welding work
- Integrated quality assurance
- Engineering
- Project Management
- Assembly

Van Halteren Metaal offers an one-stop-shop solution for its partners and has the following key competencies:

If required Van Halteren Metaal can manage complete projects where we

provide full service for our clients. Our strength lies in particular in projects in which a combination of certified welding work and high quality machining is required. From (co-)engineering to final assembly, Van Halteren is the partner for clients from different sectors including: Offshore, Semi-conductors, Defence, Automotive, Wind energy, Mining, Mechanical and Instrument engineering.
